

What is claimed is:

1. A rehabilitation aid for sexual inefficiency formed as a closed hollow body, wherein:

a wall of said hollow body is constituted by an inner layer formed out of a rubber and an outer layer formed out of a sponge rubber or a silicone rubber, wherein:

said hollow body has an elongated cocoon shape and is elastically deformed when air is filled therein, so that said hollow body can be inserted in a vagina

2. A rehabilitation aid for sexual inefficiency formed as a closed hollow body comprising:

a wall of said hollow body constituted by an inner layer formed out of a rubber and an outer layer formed out of a sponge rubber or a silicone rubber; and

a barometer connected to one end of said hollow body via a connecting pipe, wherein:

said hollow body has an elongated cocoon shape and is elastically deformed when air is filled therein, so that said hollow body can be inserted in a vagina; and

a contracting force of the vagina against said hollow body is measured by reading an enlarged scale on said barometer.

3. The rehabilitation aid for sexual inefficiency according to claim 1 or claim 2, wherein a thin rubber film is formed on the surface of said hollow body.

4. A rehabilitation aid for sexual inefficiency formed as a cylindrical body having openings on its both ends, wherein:

a wall of said cylindrical body is constituted by an inner layer formed out of a rubber and an outer layer formed out of a sponge rubber or a silicone rubber, wherein:

said cylindrical body has an elongated cocoon shape and is elastically deformed when air is filled therein, so that said cylindrical body can be inserted in a vagina

5. The rehabilitation aid for sexual inefficiency according to claim 4, wherein a thin rubber film is formed on the surface of said hollow body.

6. A rehabilitation aid for sexual inefficiency formed as a closed hollow body, wherein:

a wall of said hollow body is formed out of a rubber, wherein:

said hollow body has an elongated cocoon shape and is elastically deformed when air is filled therein, so that said hollow body can be inserted in a vagina
